

TISC completed ICT & Education Training

Information and communication technologies (ICT) have become common place entities in all aspects of life. Across the past twenty years the use of ICT has fundamentally changed the practices and procedures of nearly all forms of endeavour within business and governance. Education is a very socially oriented activity and quality education has traditionally been associated with strong teachers having high degrees of personal contact with learners. The use of ICT in education lends itself to more student-centred learning settings. But with the world moving rapidly into digital media and information, the role of ICT in education is becoming more and more important and this importance will continue to grow and develop in the 21st century.

Tura Internet & Services Centre (TISC) also completed a two months ICT & Education training programme with one hundred students from different school of Tura. Total four batch in each twenty five student from class viii to twelve was selected from different school of Tura and gave them fifteen days training on ICT & Education. During training the main focus was how student can use ICT in education and make it better.

From computer operating system to use of internet was covered in the training. The main focus was with the help of computer and internet how student can fulfil their educational need. During the training, making of project, searching content from internet, searching different topic was shown. As well as theory practical was also given. In the form of practical every student had to prepare individual assignment. Last day of the training doubt clearing and feedback session was also there.

The training programme was wonderful as such type of one was for the first time in Tura. During the feedback session student shared that one new chapter was open for them through this training programme. Really it was a wonderful programme for the student of Tura.
