

# How to Prevent the Spread of Covid-19

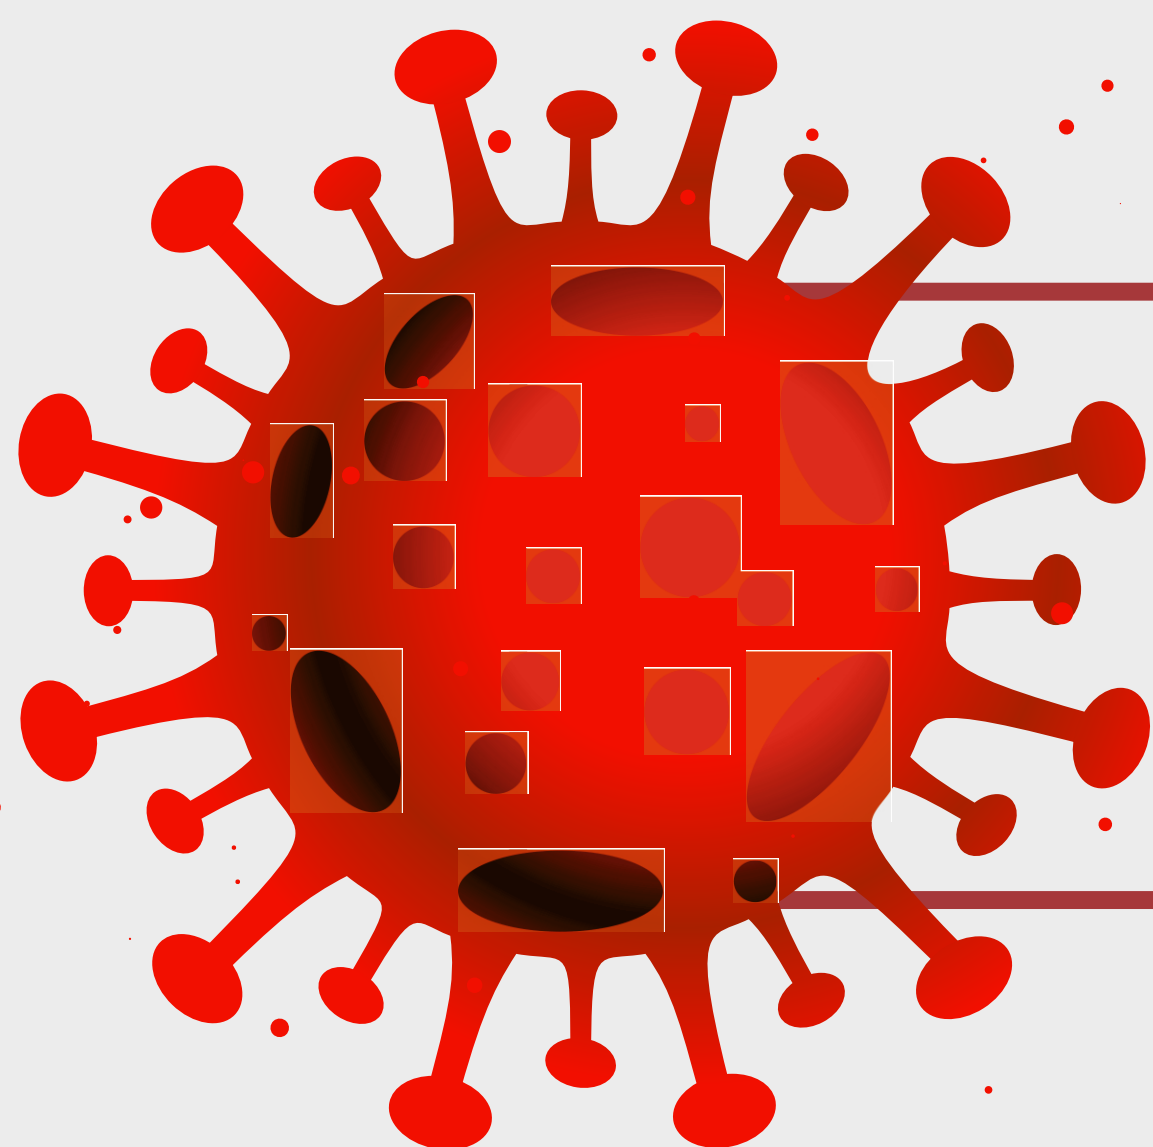

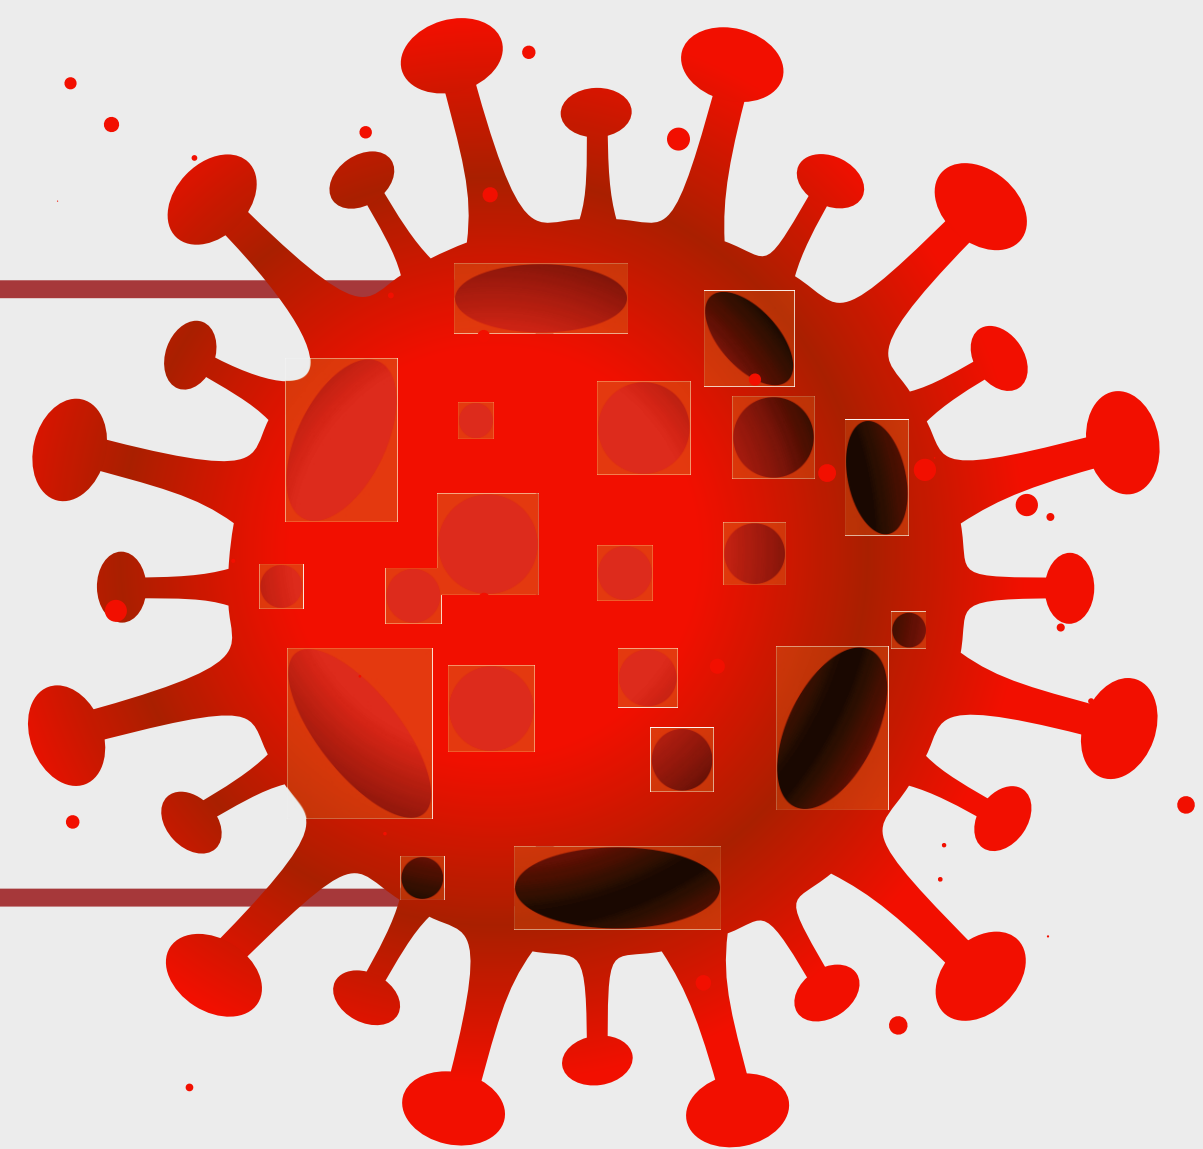

## Spread Positivity, Not Misinformation

Produce a large positive impact on society by avoid spreading unverified and fake news & encourage others to do the same.

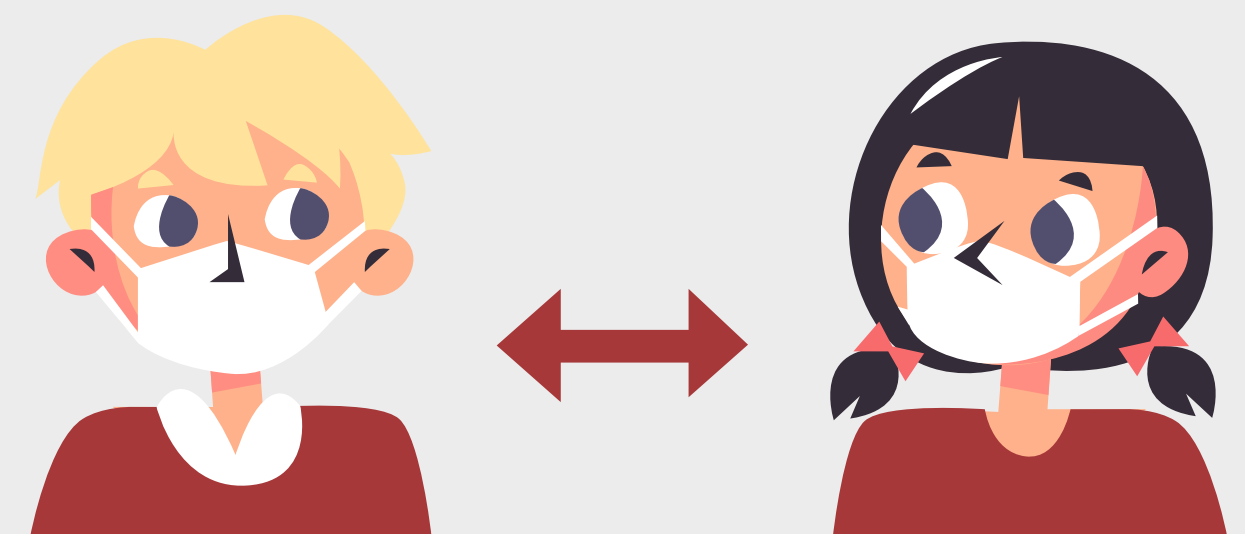

## Double is Not Trouble

Layer a cloth mask on top of a surgical mask. Double masking increases the filtration, thus reduces the exposure to SARS-CoV-2.

## Only Salaam-Namaste

Keep a physical distance of atleast 6 feet and avoid public gatherings.

## Don't say "We'll See", Go for Vaccine

Vaccine is safe and effective, just go for it when your turn comes. Avoid any rumors about vaccination.
