Conceptualized and Developed by

Skill Bot

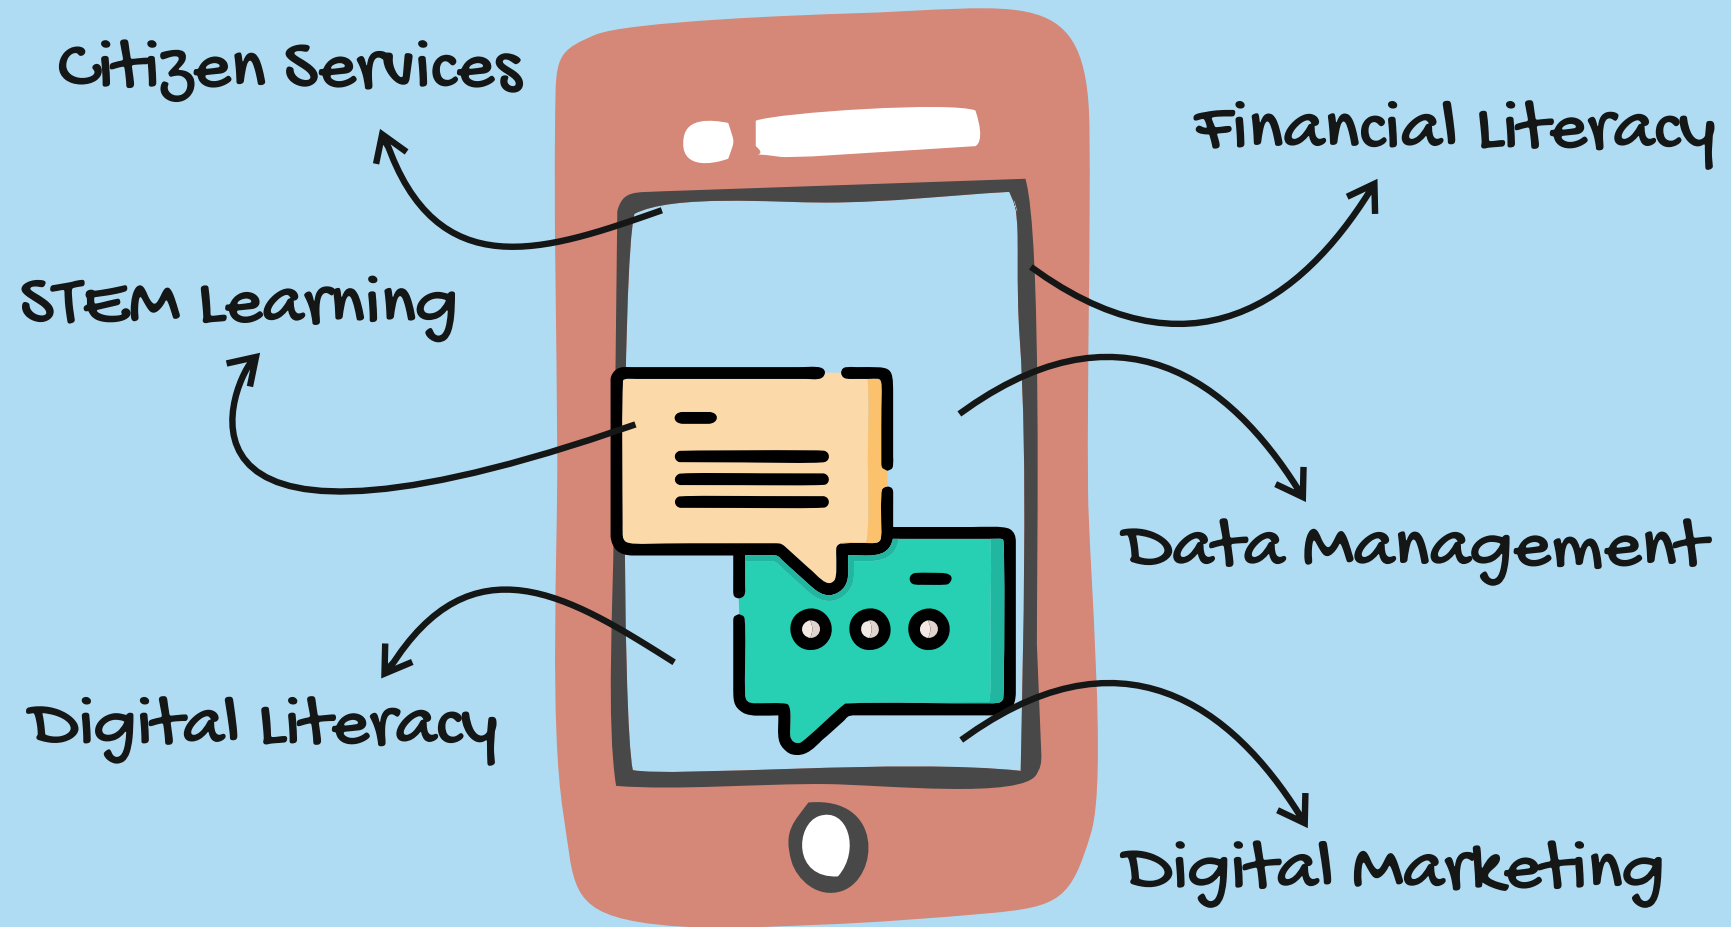

Digital Skilling Chatbot
for learners, entrepreneurs
and Livelihood

SkillBot is the first telegram based chatbot designed for building digital skill capacities of weavers/artisans, youth, men and women, in rural areas of India for enhancing their livelihood. An interactive chatbot customised for this purpose to engage people in a 30- hour learning curriculum, where one learning hour involves reading supplied learning materials, watching the video, listening to audio lessons, engaging in discussions, assessment and learning activities

Skill Bot
Interactive Engaging Impactful

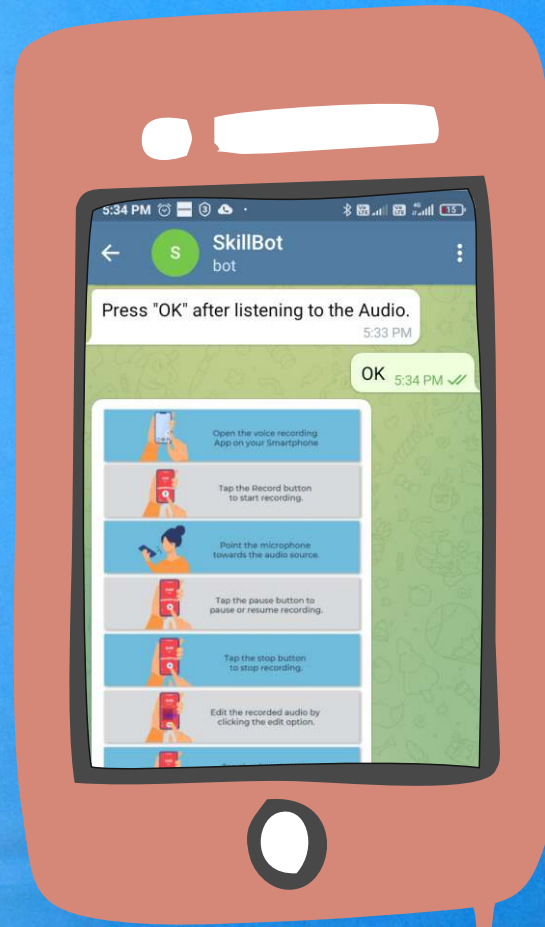

SkillBot is made to cater digital Empowerment training through oral and audio-visual medium effectively across areas like digital literacy, digital skilling, financial literacy and inclusion, jobs and livelihood and entrepreneurship etc.

✓ Self Learning

✓ Assessments

✓ Certification

Watch

A series of short videos (3-5 minutes) are delivered to the learners to watch.

Read

Additional reading materials are provided as infographics, charts, flashcards, or PDF files to read and dig deep into the content.

Discuss

Based on the contents of the lesson of the day, a discussion card is shared for the participants to react and share their thought and learning to help them better understand.

Do Assessment

Based on the videos delivered, a set of multiple-choice questions are sent as QuizBot.

Certification

Based on the assessments, a certificate of participation will be given.

Why Skill Bot?

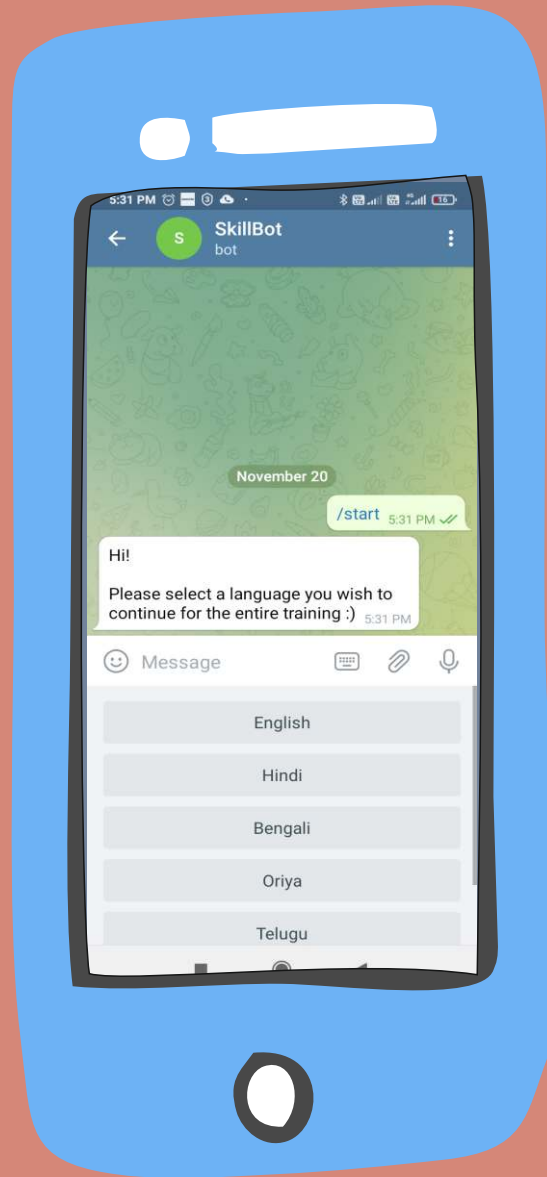

- User friendly
- Audio and Video based courses
- Pre uploaded content/modules
- Provide analytics to track the progress for timely reviews
- Availability of content in regional languages for better understanding of the learner
- Inbuilt registration feature
- Interactive learning and personalized conversation
- Promote self-paced learning
- Multi-lingual
