## Digital Empowerment Foundation

Established in 2002, DEF aims to connect unreached and undeserved communities of India. DEF finds sustainable digital interventions to overcome information poverty in rural and remote locations of India, and empower communities with digital literacy & digital tools.

IMPACT

1000+

Improvement in computer literacy levels of community children

Increased student attention and retention in schools

Expanding avenues of livelihood for the underserved and marginalized communities

Improved familiarity and comfort technology

Enhanced participation of students in the learning process

Empowering students to become socially and culturally prepared for seeking, and retaining, career building opportunities
